## **AMENDMENTS TO THE CLAIMS:**

Please cancel claims 13-20 without disclaimer or prejudice and amend the following claims:

- 1. (Original) A process of preparing finasteride Form I, which process comprises dissolving finasteride in a solvent, replacing the solvent partially or substantially completely with a non-solvent and thereafter isolating finasteride Form I.
- 2. (Original) A process according to claim 1, wherein replacement of said solvent comprises distilling off said solvent followed by addition of said non solvent.
- 3. (Original) A process of preparing finasteride Form I, which process comprises the steps of: (i) dissolving finasteride in a solvent to form a solution; (ii) distilling off the solvent from the solution obtained in step (i); (iii) adding a non solvent to the product of step (ii); and (iv) isolating finasteride Form I.
- 4. (Previously Presented) A process according to claim 1, wherein said solvent is methanol or dichloromethane.
- 5. (Previously Presented) A process according to claim 1, wherein dissolution of said finasteride in said solvent is carried out at a temperature in the range of ambient to reflux.
- 6. (Currently Amended) A process according to claim 1, wherein [[a]] the solution of the finasteride solution obtained further to addition of finasteride to said in the solvent is clarified using decolourising agents.

Amendment to Office Action Dated January 4, 2008

U.S. Appln. No. 10/563,138

Atty. Docket No.: 8693.015.US0000

7. (Previously Presented) A process according to claim 1, wherein said non

solvent is water.

8. (Previously Presented) A process according to claim 1, wherein said non

solvent is an organic solvent in which the solubility of finasteride in not more than about5%

w/v.

9. (Original) A process according to claim 8, wherein said organic non solvent is

selected from the group consisting of hexane, heptane, octane, toluene, xylene, isobutyl

acetate and isopropyl acetate.

10. (Previously Presented) A process according to claim 1, further comprising a

distillation step following the replacement step.

11. (Previously Presented) A process according to claim 2, further comprising

stirring a precipitated product obtained following the replacement step.

12. (Original) A process of preparing finasteride Form I, which process

comprises dissolving finasteride in a solvent, replacing the solvent partially or substantially

completely with a non-solvent, stirring a precipitated product obtained further to addition of

the non solvent and thereafter isolating finasteride Form I.

13-20. (Cancel)
